

Matthew Beveridge

Cambridge, MA

<https://mattbeveridge.com>
mattbev@alum.mit.edu

Current Position

NODAR, Inc.

Computer Vision Engineer, Advisors: Dr. Leaf Jiang & Dr. Piotr Swierczynski

Somerville, MA

Jul 2021 - Present

Solving untethered, vision-based 3D perception and calibration with application to autonomous robotics. Utilizing principles from signal processing and deep learning, we sense surroundings at unprecedented resolution and range.

Education

Massachusetts Institute of Technology (MIT)

Master of Engineering (MEng); Electrical Engineering and Computer Science – Artificial Intelligence

Cambridge, MA

2021

Advised by: Prof. Daniela Rus

Massachusetts Institute of Technology (MIT)

Bachelor of Science (SB); Electrical Engineering and Computer Science

Cambridge, MA

2020

Bachelor of Science (SB); Mathematics

Minor: Theater Arts

Research Experience

Distributed Robotics Lab

Graduate Researcher, Advisor: Prof. Daniela Rus, Supervisors: A. Amini & I. Gilitschenski

CSAIL, MIT

Sep 2020 - Jun 2021

Researched robust monocular depth estimation, data-driven simulation, and reinforcement learning for end-to-end (i.e., perception-to-control) autonomous driving control policies.

Draper Lab

Machine Learning Researcher (Internship), Advisor: Dr. Rebecca Russell

Cambridge, MA

Jun 2020 - Aug 2020

Formulated uncertainty quantification metrics for competency-aware reinforcement learning. These metrics were used during deployment of trained policies as a means of interpretability.

Data-Driven Inference Group

Undergraduate Researcher, Advisor: Prof. John Guttag, Supervisor: D. Blalock

CSAIL, MIT

Sep 2019 - May 2020

Derived a novel neural network pooling layer framework to adaptively choose the pooling metric, in effect treating it as a learned parameter by binning and weighting activations.

NASA

Research Engineer (Internship)

Houston, TX

Jun 2019 - Aug 2019

Prototyped, tested, and analyzed system reliability measures for the ISS, Orion spacecraft, and Gateway space station to ensure containment of mission critical applications (e.g., telemetry) from noncritical ones (e.g., email).

Camera Culture Group

Undergraduate Researcher, Advisor: Prof. Ramesh Raskar, Supervisor: G. Satat

Media Lab, MIT

Sep 2018 - Feb 2019

Improved perception in degraded visual environments (e.g., fog) by (1) modeling the diffraction of a pulsed visible laser in scattering media, then (2) subtracting it from the reading to extract the signal photons from the target.

Interactive Robotics Group

Undergraduate Researcher, Advisor: Prof. Julie Shah, Supervisor: R. Ramakrishnan

CSAIL, MIT

Feb 2017 - May 2017

Advanced decision-making in AI through studying adversarial games. Devised and executed human subject experiments to play said games and use their outcomes to inform RL policy design and human-robot interaction.

Industry Experience

General Atomics ASI

Machine Learning Researcher (Internship)

San Diego, CA

Jun 2018 - Aug 2018

Developed deep learning-based visual quality assurance using object detection and classification. Included creation of a custom, self-supplementing dataset from scratch. The model was deployed on augmented reality headsets.

ference, Inc.*Data Scientist (Internship)*

Cambridge, MA

Feb 2018 - Jun 2018

Analyzed sentiment of social media posts using natural language processing to gauge user reactions to prescription drugs. Also parsed disease indicators to map relational trees by semantic association.

Mosaic Power*Software Engineer (Internship)*

Frederick, MD

Jun 2017 - Aug 2017

Optimized power grid efficiency by learning tenant energy use patterns and intraday fluctuations in grid-wide demand to intelligently cycle commercial water heaters and HVAC systems, reducing peak loads without interrupting service.

Teaching, Mentorship, and Service**MIT Micro-Internship Program***Mentor*

NODAR, Inc. & MIT

Jan 2022 - Present

Supervise MIT undergraduate students on computer vision and robotics projects while a part of NODAR.

- **Megan Ngo** (*Jan 2022 - Feb 2022*): Design, fabrication, and implementation of a multisensor vehicular perception rig including 4x RGB, 2x LWIR, 1x LiDAR, and 1x GPS/INS sensors.

MIT 6.862: Applied Machine Learning*Teaching Assistant*

EECS, MIT

Sep 2020 - Jun 2021

Mentored graduate students on semester-long projects in machine learning. Developed and taught tutorials, and reviewed writing and presentations for a course of 43 and 69 students in the Fall and Spring semesters respectively.

MIT 6.036: Introduction to Machine Learning*Teaching Assistant*

EECS, MIT

Sep 2020 - Dec 2020

Developed course materials and instructed laboratory sessions for MIT's introductory machine learning course of 473 students. Aided in the transition to remote instruction due to COVID-19.

MIT Driverless*Team Lead, Member*

Cambridge, MA

Aug 2020 - Jul 2021

Led a team of engineers to innovate simulation environments for high-speed, multi-agent autonomous racing at the inaugural Indy Autonomous Challenge and Roborace Season Beta.

MIT EnergyHack*Director of Corporate Relations*

Cambridge, MA

Jun 2019 - May 2020

Coordinated corporate sponsorships and guided challenge creation for MIT's premier energy and climate hackathon. Organized and executed event proceedings for more than 330 participants across multiple days.

Honors and Awards**Best Paper: Pathway to Impact, NeurIPS (CCAI Workshop)**

2021

Northrop Grumman Engineering Scholar

2016 - 2020

NEWMAC Academic All-Conference

2017

Society of American Military Engineers (SAME) Scholar

2016, 2017

Academic All-American in Lacrosse

2016

National Football Foundation Scholar Athlete

2016

Professional Activity**Reviewing**

IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR)

2022, 2023

European Conference on Computer Vision (ECCV)

2022

International Conference on 3D Vision (3DV)

2022

IEEE Winter Conference on Applications of Computer Vision (WACV)

2023

ProgramsNeurIPS Climate Change AI Mentorship Program – *Mentee*

2022

Key Skills

Computer Vision: Depth Perception; Object and Obstacle Detection; Semantic Segmentation; Stereo Vision; SfM and MVS; SLAM; Intrinsic and extrinsic sensor calibration (both online and offline); Multi-sensor arrays; RGB, LWIR, and LiDAR sensors; Sensor triggering, synchronization, and networking.

Machine Learning: Deep Learning including CNNs, RNNs, GANs, and VAEs; Machine Learning including SVM, KNN, Decision Trees, Bayes, and AutoML.; Federated Learning including attacks and defenses; Dataset creation and curation from scratch.

Mathematics: High-Dimensional Geometry; Optimization; Numerical Analysis; Information Theory; Graph and Combinatorial Theory; Statistics and Probability; Stochastic Processes; Algorithms; Linear Algebra and Differential Equations.

Programming: Python; Julia; Java; R; SQL; C/C++; Git; *nix OS; HTML; C#; PyTorch; Tensorflow; Drake; ROS; NumPy, Pandas, SciPy, OpenCV, Open3D and similar tools; CI/CD; Docker; Cloud Computing including AWS and Google Cloud.
